

Corentis Shield

AI checkpoint for regulated workflows

Design partners and pilot teams

Corentis Design Partner Pack

A collaborative path to validate AI checkpointing in one controlled workflow.

AI needs a checkpoint before it acts. Corentis provides it.

A practical pack for teams exploring a controlled, non-production pilot around complaints, vulnerable customers or regulated casework.

Generated April 2026

For discussion and pilot exploration only

Overview

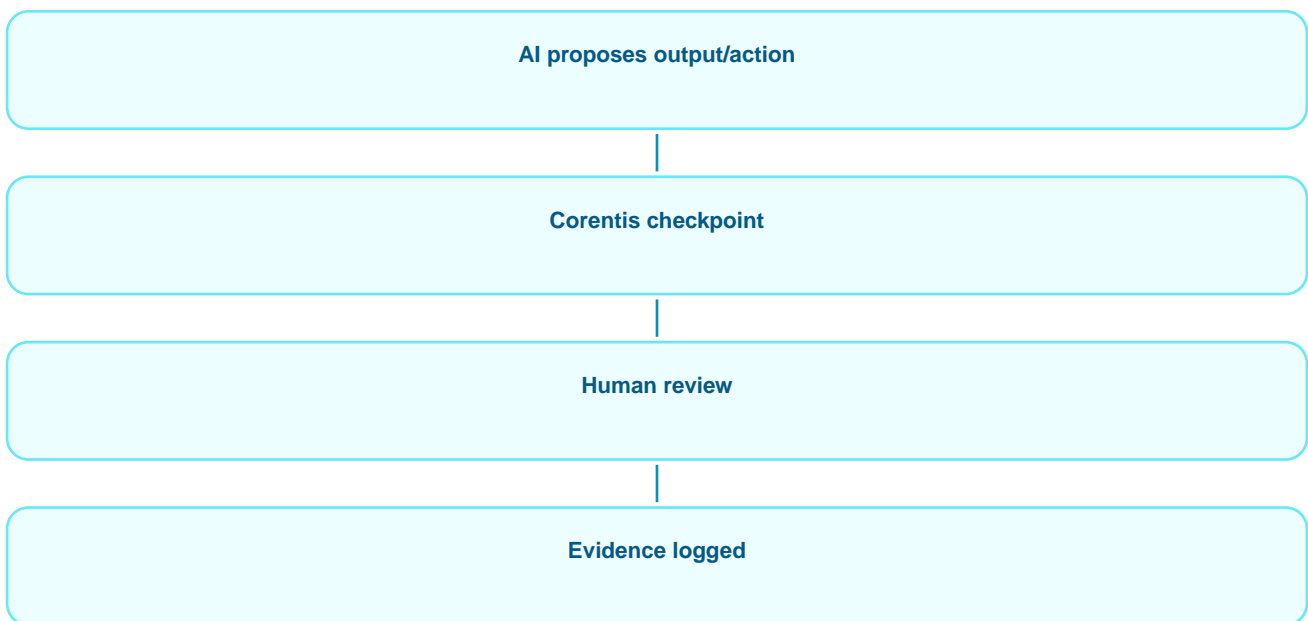

Core position

Corentis Shield is an AI checkpoint for regulated workflows.

AI needs a checkpoint before it acts. Corentis provides it. Corentis Shield is designed to help teams check AI outputs before they reach customers, teams or live systems.

VISUAL SUMMARY

Checkpoint flow

Why become a design partner

Design partners help shape the first real validation path. Corentis is looking for practical conversations with teams that understand sensitive workflows and want AI adoption to be controlled, reviewable and evidence-led.

The first pilot opportunity

The first pilot can be narrow, non-production and useful: one workflow, a defined set of scenarios, clear checkpoints, human review routes and a sample evidence pack.

What a controlled pilot can explore

A pilot can explore how Corentis checks AI-drafted responses, identifies sensitive customer signals, routes human review and creates evidence before customer communication or case action moves forward.

A human moment

Example context: a customer discloses job loss, missed payments and distress after repeated contact. An AI assistant drafts a standard response. Corentis Shield checks whether that output should pause, route to human review and record evidence before any customer communication proceeds.

What the partner gives

A design partner can provide workflow context, sample policy expectations, non-production scenario examples, reviewer feedback and practical insight into what would make a checkpoint usable.

What the partner receives

The partner receives a clearer view of the control pattern, a sample pilot report, evidence outputs, review lessons and a grounded understanding of whether the approach fits their operational reality.

First 30 days of a pilot

The first month should stay focused and useful.

- Define one workflow boundary.
- Agree sample scenarios and policy expectations.
- Map key checkpoint decisions.
- Run baseline and checkpointed examples.
- Review evidence completeness and reviewer experience.

What a successful pilot conversation unlocks

A strong first conversation can define the workflow, agree the evidence needed, identify reviewer needs and create a realistic route from prototype validation to controlled pilot evidence.

Next step

If your organisation is exploring AI agents in regulated workflows, Corentis is ready for a focused conversation about validation, pilot design and strategic support.

SELECTED SIGNALS

Evidence context

FCA COMPLAINTS DATA

UK financial services firms received 1.85m complaints in 2025 H1.

Financial Conduct Authority, 23 October 2025

FOS COMPLAINTS DATA

The Financial Ombudsman Service received 305,726 new complaints in 2024/25.

Financial Ombudsman Service, 2 July 2025

FCA FINANCIAL LIVES

26.4m UK adults had characteristics of vulnerability in May 2024.

Financial Conduct Authority, 16 May 2025

FCA FINANCIAL LIVES

In around 1 in 5 recent contact cases, consumers found it difficult or were not able to get through to someone at their financial services provider.

Financial Conduct Authority, 16 May 2025

SALESFORCE AI CUSTOMER RESEARCH

72% of customers say it is important to know if they are communicating with an AI agent.

Salesforce, 2026 page accessed / report current at access

QUALTRICS CUSTOMER EXPERIENCE RESEARCH

53% of bad experiences result in customers cutting spending.

Qualtrics, 2 December 2024
